First National Walk-In Medical Center Provides a New Healthcare Alternative in the Wilmington Area

When you have a medical problem that needs immediate attention, where will you go to find it? And who can you turn to for a low cost, without compromising your quality of care? Well, a husband and wife business team believe they have a prescription for a cure...Doctors Express!

Ed and Terri Murphy opened their doors to patients on October 9th. They're located at 2105-A Concord Pike, in the Fairfax Shopping Center in Wilmington.

This is the first time ever walk-in medical care has been nationally franchised, providing better cost containment and leveraging best practices. "The people of Wilmington not only deserve great healthcare, but also a system of convenience," says Ed Murphy. "Doctors Express is the best of both worlds. Your average wait time is just 15-20 minutes, and your care is at the hands of an experienced doctor during all operating hours, including weekends. We live in a busy world, and we value the time families want to spend together at home, and it shouldn't have to be spent waiting for medical treatment." Both children and adults can be seen at Doctors Express.

They treat the typical colds, coughs, cuts and bruises, as well as x-ray and diagnose broken bones, test and give immediate results for strep and mono, and fill most prescriptions right on the spot. Murphy says, "Think of us as an alternative to the modern day emergency room for non-life threatening healthcare needs, without the wait."

The Murphys are proud to partner with Dr. Mark Haegele, who has more than 20 years experience as a family and emergency care physician. Doctors Express is conveniently open Monday – Friday, 8 a.m. to 8 p.m. and Saturday-Sunday, 8 a.m. to 5 p.m.
